## 04 PROJECTS

Feb 2022 — Present

### Online Voting System based on blockchain

**Online voting and voter registration system** is very exciting topic. I used *React js*, *Css* for fornt-end *jacascript*, *MongoDB* for backend and Database. for blockchain *Solidity* and *Python*, It's vary interesting topic

Jul 2021 — Nov 2021

### Face Mask Detection by using python

**Face Mask Detection** for survelliance to monitor people wether, they wearing mask or not in public places. I used *Python* with respective libraries like *TensorFlow* and *OpenCV*.

Jan 2021 — Apr 2021

### Student Management System

The main ideal of the Student Management System is to manage the details of Courses, Logins, Examinations, freights. It manages all the information about , Student, freights.The design is completely erected at executive end and therefore only the director is guaranteed the access.
